THE CUTTING PARTNER OF SMALL
SIGN-MAKERS

DESK TRIM

Is a compact and robust manual cutter, suitable as entry-level solution or backup system for all professionals of visual communication and service centers that seek a lightweight, versatile and powerful cutting solution.

OPTIONS / ACCESSORIES

Among the options available are a pair of reference squares, a stand in steel tubes with adjustable feet for placement on the ground and a container for the collection of waste.

MAIN FEATURES

Desk Trim is equipped with a cutting blade mounted onto the scroll bar.

The work surface in sheet steel epoxy powder coated steel is resistant to cuts and scratches, while a lattice screen printed with millimeter scales guide the operator in positioning and cutting of various formats.

The cutting thickness up to 0.6 mm allows you to easily trim cardstock-weight, lightweight plastics, PVC banners and many other printed materials or otherwise.
